Villiers Queensland Pty Ltd.	10.6%
------------------------------	-------

Event

Boab Metals has released assay results from its recent drilling program at the Sorby Hills Lead Silver Project. Boab appears on track to release an updated resource statement this quarter. Boab Metals recently changed its name from Pacifico Minerals and conducted a 1 for 25 share consolidation.

Boab Metals is developing the Sorby Hills Lead-Silver Project in the Kimberley Region of Western Australia. Boab holds a 75% interest in the Sorby Hills JV with China's largest lead smelting and silver producer Henan Yuguang holding 25%. Boab recently released a Pre-Feasibility Study (PFS) and is now progressing to a Definitive Feasibility Study (DFS). Boab is conducting additional exploration and Resource definition drilling in anticipation of a Final Investment Decision in late 2021, a 12-18-month construction period and first production in mid-2023.

Highlights

- The drilling program is now complete with 4,803m drilled. The drilling program had two objectives and appears to have achieved both;
 - Support metallurgical and geotechnical test work for the Definitive Feasibility Study (DFS), and
 - Expand the resource.
- All metallurgical drill holes have intersected mineralisation as expected.
- Several drill holes have encountered new thick intersections of mineralisation immediately adjacent to the current open pit designs. This is likely to extend the Mineral Resource Estimate.
- Significant intercepts include;
 - SHDD043: 11m @ 7.4% Pb and 29g/t from 35m.
 - SHDD039: 21m @ 3.4% Pb and 15g/t Ag from 31m.
 - SHDD024: 17m @ 7.5% Pb and 157g/t Ag from 72m.
- Drill holes SHDD017 in the Omega North deposit and SHDD039 in the Southern Omega Deposit have intercepted mineralisation below the current design pit and has confirmed historic deeper drilling which intercepted mineralisation not incorporated into the current Mineral Resource Estimate.
- Drill hole SHDD043 has confirmed the continuity of the Omega orebody down dip of the current Mineral Resource Estimate and open pit design. It indicates a broader zone of mineralisation than previously modelled and will allow integration of historic intercepts down dip.
- Further assay results are expected over the next month with a resource update scheduled for 1Q 2021.
- Boab now has all of the core samples it needs to complete the DFS metallurgical testwork program to optimise the process flowsheet and finalise the process plant design.

Recommendation

We retain our Buy recommendation and price target of A\$1.02ps. Catalysts for the stock to reach our price target include;

- Further Resource upgrades post ongoing drilling programs.
- Delivery of the Sorby Hills Project through the course of FY21/22.
- Resolution of financing options.

Company Description

Boab Metals is a base metal exploration and development company, primarily focused on its flagship Sorby Hills Project in Kununurra, Western Australia. The flagship Project is the largest undeveloped, near surface lead-silver-zinc deposit in Australia. Sorby Hills is 75%-owned by Boab Metals and 25% owned by Henan-Yuguang - China's largest lead smelting / silver producer.

Key risks

- The prices of silver and lead are volatile and difficult to forecast. The actual prices may differ substantially from our forecasts.
- The Sorby Hills project is not yet producing and there is a risk that Boab is unable to bring the operation in to production. The project may cost more than expected to build and may not operate as expected.
- Boab requires around \$150m of new capital to finance its 75% share of the Sorby Hills Project. There is a risk that capital markets are not willing to fund the project.
- Forecasting future operating costs has considerable uncertainty. Our forecasts may prove to be too optimistic. If Boab's costs are higher than we expect then our cash flow forecasts will be too high.
- Smaller companies carry more significant 'key personnel' risk than larger organisations. If senior management depart the company, then it could delay projects or exacerbate operational risks.

Core drivers and catalyst

- In August 2020, Boab released the results of a Sorby Hills Pre-Feasibility Study (PFS). The PFS outlined a A\$183m project mining 1.5Mtpa of ore and producing 78ktpa of a lead/silver concentrate over a 10 year mine life. The annual production of contained metals is expected to be ~50ktpa of lead and 1.5Mozpa of silver.
- The PFS resulted in an estimated pre-tax NPV of A\$303M (at an 8% discount rate) and an IRR of 46% (assuming 10-year historical average prices of US\$0.95/lb lead and US\$21/oz silver). Our post-tax NPV of A\$189m is lower than the PFS, mainly due to a higher WACC assumption of 10%.
- Boab is progressing to a Definitive Feasibility Study (DFS) and is conducting additional exploration and Resource definition drilling in anticipation of a Final Investment Decision in late 2021, a 12-18-month construction period and first production in mid-2023.
- The Sorby Hills Reserve currently stands at 13.6Mt at 3.6% Pb for 490kt of lead and at 40g/t Ag for 18 Moz of silver. There is likely to be Reserve upside given;
 1. ~5Mt of Resource has been excluded from the PFS to ensure the Project does not step outside the existing Environmental Protection Authority (EPA) approved development zones.
 2. Boab has completed a 4,803m drilling campaign that included in-fill drilling of high-grade zones and targeted shallow extensions to presently defined mineralisation.
 3. Exploration upside in a license 100% held by Boab immediately to the south of the JV Project.
- We model a further A\$150m of capital requirements to fund Boab's 75% share of pre-production capex, working capital and ongoing exploration. We expect PMY to split the funding roughly A\$50m/A\$100m equity/debt. We forecast gearing to peak at 44% in FY23.
-

Rating Classification

Buy	Expected to outperform the overall market
Hold	Expected to perform in line with the overall market
Sell	Expected to underperform the overall market
Not Rated	Shaw has issued a factual note on the company but does not have a recommendation

Risk Rating

High	Higher risk than the overall market – investors should be aware this stock may be speculative
Medium	Risk broadly in line with the overall market
Low	Lower risk than the overall market

RISK STATEMENT: Where a company is designated as ‘High’ risk, this means that the analyst has determined that the risk profile for this company is significantly higher than for the market as a whole, and so may not suit all investors. Clients should make an assessment as to whether this stock and its potential price volatility is compatible with their financial objectives. Clients should discuss this stock with their Shaw adviser before making any investment decision.

Disclaimer

Shaw and Partners Limited ABN 24 003 221 583 (“Shaw”) is a Participant of ASX Limited, Chi-X Australia Pty Limited and the holder of Australian Financial Services Licence number 236048.

ANALYST CERTIFICATION: The Research Analyst who prepared this report hereby certifies that the views expressed in this document accurately reflect the analyst's personal views about the Company and its financial products.
